

This Request for Tender is to select a professional services contractor to undertake a risk based condition assessment and capacity assessment for Bateau Bay Wastewater Treatment Plant (BB WWTP). This assessment will then be used to prepare a staged capital works plan for the BB WWTP. The work includes:

- Assessment of hydraulic and biological capacity of each individual process unit.
- Identification of options to remove hydraulic and biological constraints
- Condition and serviceability assessment of various infrastructure
- Preparation of a staged capital works plan.
- Preparation of an overall facility report.
